

For more than 165 years, Anheuser-Busch has been woven into the cultural fabric of the United States, carrying on a legacy of brewing great-tasting, high-quality beers that have satisfied beer drinkers for generations. The brewer operates 23 breweries, 29 distributorships and 23 agricultural and packaging facilities across the US.

AB has a very complex network of breweries, DCs and WODs throughout the United States. To increase efficiency in the Northeast, AB has decided to open a new warehouse in the greater Columbus area.

IPS USA has been tasked with converting the existing warehouse to a Controlled Environmental Warehouse (CEW). There will be a craft and draught cooler installed in the CEW. Specific temperatures must be maintained in each room in order to ensure the great quality of Anheuser-Busch's many different beers.
