Logistic Study and Plant Extension

Mecadigit, Belgium, 10/2005 - 04/2006

PRIMARY | CHEMICALS | PROJECT FEASIBILITY | PROJECT PREPARATION | PROJECT REALIZATION | BELGIUM | SPAIN

Mecadigit part of Matrio group is a specialist for high-tech metal plating. The group develops efficient and innovative solutions for several sectors: automotive, telecommunication electronics, aerospace industry, etc.Mecadigit specializes in electrodeposition on metals and intends to extend his current facility.

The project consisted in the extension of the current Mecadigit production facilities as well as the warehouse and office/ lockers area.

The target is the optimisation of the existing production-flow by placing the intermediate storage into a new position, solving the unloading and downloading area and offering the best solution possible in regard to the extension of the new production-line.
