Cutting and Packaging Line

Almeco GmbH, Germany, 08/2009 - 05/2010

PRIMARY | PROJECT PREPARATION | PROJECT REALIZATION | GERMANY

The ALMECO-Group, headquarter in Milano, Italy, is a international corporation and leader in the processing and refining of aluminium. The highly modern site in Bernburg, Sachsen-Anhalt, produces highly reflective and absorbing surfaces on aluminum for the solar and lighting industry.

Because of the successful and dynamic development, the ALMECO-Group decided to further enlarge the production site in Bernburg. With the errection of the cutting and packaging line, the activities were greatly enhanced.

Principal project data

Integration of a new cutting and packaging line in the existing plant.

- during continuous production with highly sensitive vacuum coating machine
- tremor-free special deep founding of the pool (6m) in foundation area of the hall

Scope IPS

Project Preparation

- Concept, layout
- Project coordination
- Permitting

Project Realisation

- Static calculations, layout foundation
- Construction planning
- Allocation and call for bidding (foundations)
- Construction supervision and management

IPS operational unit(s)

- IPS Germany GmbH
