New Aluminium Scalper

DEFINE | MANAGE | PRIMARY | BELGIUM

ALUMINIUM DUFFEL BV, a company of GFG Alliance, has an integrated aluminium plant, situated in Duffel, Belgium, equipped with casters, mainly used for internal scrap remelting, a hot rolling mill, three cold rolling mills and a large number of finishing and conditioning lines.

The scope of this project is the installation of a new Scalper and Saw line to treat slabs coming from the cast house and going to the hot rolling mill. The objective is the increase the capacity and the range of product treated on site.

Project Results

- Procurement done for the main packages and ready to order
- Budget made
- Overall planning made
- Preparation works defined
- Project is ready for customer approval
