Lime Plant Syktyvkar

CARMEUSE, Belgium, 07/2005 - 05/2007

PRIMARY

CARMEUSE

Principal project data

Realisation of a new lime plant in exchange of an existing lime kilns.

- Capacity 250t/d
- Basic material 500t/d lime stone, 40-80mm
- New bays of 1.965 m²

Scope IPS

Project Preparation

- Detailed layout and layout coordination
- Detailed time Schedule
- Permitting (management)
- Procurement / contracting

Project Realisation

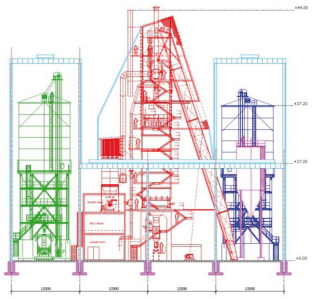

- Project coordination, administration and quality
- Time schedule
- Budget tracking
- Site & Safety Management

IPS operational unit(s)

- IPS Germany GmbH

Carmeuse is a leading global producer of lime, high calcium limestone and dolomitic stone dedicated to many different uses. Related products are used in steel and glass production, building materials, plastics, paints and water treatment. Carmeuse are present in about 90 plants across the world.

The IPS GmbH realised, in cooperation with IWP GmbH, a new lime plant in Syktyvkar, about 1.200 km northeast of Moscow. Main equipment that are installed include: belt conveyor system, screening and crushing machines, kiln, bins for lime stone and quick lime, dedusting equipment and filters. Additionally, a workshop, an office and an administration builing have been constructed.
