New Production Facility

PPG Industries, China, 02/2007 - 03/2008

CHEMICALS | PRIMARY | PROJECT PREPARATION | PROJECT REALIZATION

PPG Industries' idea was to continue to be the world's leading coatings and specialty products company. The company helped its customers in sectors of industrial, transportation, consumer products, and construction markets to enhance surfaces some of the enhancements include protection, or performance.

The new plant located in Tianjin, China will produce coating for automotive and industrial purposes. PPG wants to fulfill this growing demand of its customers with this investment.

The content of the project:

Workshop: mainly one-story building, partially 3 floors for the laboratories in light steel structure.

Warehouse: same construction method, connected via roof structure with the workshop.

Utility Building: two-story building in concrete and steel frame structure.

Principal project data

Erection of new production plant.

- Total floor area: 8.959sqm
- Workshop, warehouse and utility building
- with 3 main access points

Scope IPS
