

Production Facility Upgrade

PALMCI, Ivory Coast, 09/2012 - 10/2013

FOOD AND BEVERAGES

PROJECT FEASIBILITY

PROJECT PREPARATION

PROJECT REALIZATION

Principal project data

Integration of effluent treatment installations in existing plant.

Scope IPS

Project Feasibility
Project Preparation

- Chemical analyses
- Additional topographic survey
- Technical choices for treatment
- Detailed Engineering
- Layout

Project Realisation

- Procurement
- Site Mangement

The Ivorian group SIFCA, west african leader in the natural rubber, sugar and palm oil, took over PALMCI in 2008. PALMCI is involved in the cultivation, processing and marketing of Crude Palm Oil (CPO).

PALMCI wants to integrate effluent treatment installations in its oil plant in Toumanguie, Côte d'Ivoire.

The plant currently has no treatment of discharges with the exception of a Florentin oil separator type.

The IPS Africa team prepared and realised this project integrated in the structure of the customer.
