

NLMK DanSteel A/S, part of NLMK International B.V. was established in 2002 in continuation of Danish Steel Works Ltd., which was founded in 1940. The plant, located at the sea 70km north of the Danish capital Copenhagen, employs approximately 400 workers onsite and in the offices.

NLMK DanSteel A/S produces steel plates and offers additional services such as surface treatment, plasma cutting, marking and quality checks of all produced plates. With their own harbour and direct train connection, the site has ideal logistic connections. The prime source for the yearly production of approximately 505.000t are slabs from Novolipetsk Steel (NLMK), Russia.

Project description 2 to provide

Revamp of Hot Rolling Mill

Dansteel, Denmark, 09/2012 - 04/2013

PRIMARY

EUROPE

PROJECT REALIZATION
