

P&G is the world's largest and most profitable consumer products company, with nearly \$84 billion in sales and 25 billion-dollar brands. P&G has a big market capitalization, greater than the GDP of many countries, and they market their products in more than 180 countries.

The project target was to design, construct and ensure readiness of all facilities as well as utilities to be able to host and enable vertical startup of Ambipur packing lines and making unit. The project had different phases: Phase 1: Exit of production lines to other sites. Phase 2 (IPS scope): Conditioning of packing building includes utilities, construction of warehouses including storage racks and radioshuttle, refurbishment of existing offices and changing rooms. Phase 3: relocation of packing lines and installation of making units.

Project description 2 to provide

Ambipur Relocation

Procter and Gamble Spain, Spain, 07/2012 - 12/2013

PROJECT FEASIBILITY

PROJECT PREPARATION

PROJECT REALIZATION

Principal project data

Ambipur Packing Lines-relocation:

- 26.000m2 scope
- Packing area incl. utilities
- Palletizers areas,
- Making units
- 2 Office
- 5 Warehouses,
- HERO water unit,
- Store Rooms
- Laboratories
- Roads & Parking
- Fire Loop

Scope IPS

Complete EPCM or site conditioning

- Feasibility Study
- Detailed Design
- Coordination
- Procurement

- Site Supervision
- Time Schedule
- Cost Control
- Acceptances

IPS operational unit(s)

- EMPI SARL
- IPS Spain sa
