

The Solarec company belongs to two Belgian dairy cooperatives : Lac+ and Chéoux. Each year there are investments in order to improve the performance of their manufacturing equipment, which enables them to maintain a constant quality of their products.

The Solarec plant is located in Recogne, in the heart of the Belgian Ardennes.

Equipped to process 600 million litres milk per year. The modern facilities combine quality with efficiency to supply a complete range of dairy products throughout the world, from milk powder to butter, as well as UHT milk packaging.

Solarec projects:

- Upgrade the area of the butter factory
- Increase the production capacity of the UHT factory
- Building a new roof structure
- Installation of a new bag filling machine to fill 25 kg bags under inert atmosphere
- Installation of a new big-bag filling machine.

Performance Improvement

Solarec Europe, Belgium, 09/2010 - 04/2012
