

Lorien Engineering Solutions is specialized in Engineering Design and Project Management and received an order of InBev breweries for several projects. In order to ensure a good continuity of the projects, IPS gave support in Hoegaarden and Jupille.

- Hoegaarden: Integration of 9 CCTs and 4 BBTs; upgrading beer and CIP plc's from siemens5 to siemens7; installing two new beer mains to road tankers; upgrade chilling and compressed air capacity
- Jupille: Integrating green beer centrifuges to, installation of top plates on the BBTs; installation of sugar dosing skid; upgrade existing filtration room; installation of carbonators that enable flexible CO2 dosage to different beer types

Capacity Improvements

Lorien Engineering, Belgium, 12/2007 - 05/2009
