

SNA is present in the market of livestock's food since 1976. It is the trademark property of the Poulina Group Holding; it is the first Tunisian exporter of vitaminized mineral compounds. SNA is the leading Tunisian firm in manufacturing compounded foods and VMCs certified HACCP and in the processing and production of VMC's.

The purpose of the project is the construction of new Animal Food plant producing:

- Foods Compounds (complete and complementary) with the three forms of presentation (Flour, Granulated and crumbled) are intended for all livestock (poultry, ruminants, rabbits and dogs).
- Compounds Vitamins Minerals (CMV) which are intended for use as ingredients in compound feed. The CMV contain macronutrients (Ca, P, Mg, Na, Cl, K, ...), trace elements (Mn, Cu, Zn, Fe, Se, Co, I, ...), vitamins (A, D3, E, K3, B vitamins) and other food additives (amino acids, enzymes, coccidiosis, ...)
- Storage of Raw material: corn, soybean meal and alfalfa.

In order to develop its production capacities, PGH asked EMPI (Group-Ips) for assistance for the construction of the new animal food plant at Jbel Oust.

Our Scope consists on:

## Construction of new Animal Feeding Plant

Poulina Group Holding, Tunisia, 08/2013 - Ongoing

FOOD AND BEVERAGES

PROJECT REALIZATION

PROJECT PREPARATION

TUNISIA

### Principal project data

New Animal Feeding Plant with a capacity of 60t/h

### Scope IPS

#### Project Preparation

- Detailed engineering:
- Civil
- Steel structure
- Shop fabrication drawings
- Tender packages

#### Project Realization

- Procurement Management
- Construction Management
- Project Coordination

### IPS operational unit(s)

- EMPI SARL

- Civil detailed engineering
- Steel Structure detailed engineering
- Electrical Engineering
- Construction Management
- Preparation of tenders
- Procurement Management
