

As part of the technology group RAG, the Chemicals Business Area of Evonik Industries operates in different areas of specialty chemicals, a field in which it ranks among the top global industries. These chemicals include inorganic materials, health and nutrition, coatings and additives and polymers.

The project includes a full renovation of the entry hall for the director's office building and of a part of the restaurant.

Entry Hall:

- 150 m² on 3 floors

Restaurant:

- 200 m²
