

Puratos Group provides innovative ingredients and tailor made solutions to the bakery, patisserie and chocolate sectors. With 53 plants in 39 countries and about 5,500 employees, Puratos is one of the major players in this industry. The headquarters are situated in Groot-Bijgaarden, Belgium.

Today, Puratos USA consists of three sites at the US East Coast. One site houses the powder production, a second site contains all wet goods production installations and the third site is used as a distribution center.

In order to consolidate a significant growth in the coming 10 years, Puratos wishes to reorganize and upgrade their production facilities significantly.

The current wet goods production site will be extended. Therefore, new production areas for wet lines as well as for the complete powder production will be constructed.

The current powder production factory will be transferred into a distribution center, allowing for the leasing of the third building to be stopped.

Next to a serious rise in production capacity, the factory will set new standards on hygiene and food quality levels.

Reorganization and Modernization
